How to Recognize an Authentic Intuitive Reader

Today, many people consult an Intuitive Reader for answers to life's problems. However, the process of finding someone authentic is a problem in itself. It is easy to spend hundreds of dollars before you find "the real deal".

Before you let a stranger into your mind, you need to know if their "feet" are clean—is he/she honest and sincere. Does he/she have any formal training? Is he/she sensitive to your needs?

So how do you figure out if a person really has psychic ability or if you are about to be scammed? Here are tips to help you recognize the real thing before you spend your money.

- ❖ Before booking ask questions other than how much do you charge.
 - How long have you been reading?
 - What is your training background?
 - What can I expect during a reading?
 - Can you read with or without the cards? (a clairvoyant uses cards but can read without them)
- ❖ Establish pricing up front. No additional money should be requested at any time during or after the reading.
- ❖ The Intuitive should connect with you at the beginning of the reading. He/she talks, you listen. At some point there will be questions, but never at the opening of the reading.
- ❖ Choices should be presented to you, not made for you. The point is to empower you to make you own decisions, regain control of your life.
- ❖ The Intuitive is not a god, only a messenger. Although impressive, they are not someone to hand your life, holdings or will over to. If they make a play for any of the above...run.

"I will not let anyone walk through my mind with their dirty feet." – Mahatma Gandhi.

Healing begins in the mind and you should choose a practitioner for your mind just as carefully as you choose a doctor for your body.

Due to stressful work and personal situations, many people are consulting with Intuitives today. A well-trained Intuitive can give you guidance and help open the door to resolving even the most difficult of your problems. However, they should not be used as a crutch nor should they replace your therapist, psychiatrist, psychologist, or doctor's advice.

The mind can and does heal the body, but we are not trained along the lines of mind control, so until we master our minds we need our doctors; and just as a doctor cannot do Intuitive readings; an Intuitive cannot perform as a doctor.
